

MARCHINGTONSTONE

Delivery Options and Vehicle Dimensions

Our main operational area covers the North West region, including Cheshire, Cumbria, Derbyshire, Greater Manchester, Lancashire, Merseyside, North Wales, Staffordshire, South and West Yorkshire - although we do deliver throughout the UK.

Whether it is 10 tonne of Decorative Gravel to a tight spot or 1,000 tonnes a day to your major contract, we never break stride.

Various delivery options are:

PALLETS

Small bags contain approximately 25Kg of material at the time of loading.

BULK BAGS

Bulk bags contain approximately 800-900Kg depending on customer requirement.

FLATBED OR CURTAIN-SIDED LORRY

To allow the greatest flexibility to the customer, we can deliver a mixture of bulk bags and small bags/pallets together on the same vehicle, so you can pick and choose whatever you require. Standard deliveries are made on Articulated vehicles, but we also offer the option to choose smaller rigid vehicles with fork or crane-off ability.

ARTICULATED TIPPER TRUCK

Loose load size 29 tonnes.
Typical length 14.2m (46.6ft)
Typical width 3m (9.85ft)
Typical height at rest 4m (13.1ft)
